

ALPhA 2019 New England Regional Meeting Overview

WHEN: 9 AM– 6 PM, June 13th, 2019

WHERE: Integrated Science Complex, College of the Holy Cross
1 College St
Worcester, MA 01610

WHO: You! This is a conference for instructors, faculty, staff, and industry partners interested in Advanced Physics Laboratories beyond the first year in undergrad.

WHAT: This Regional ALPhA Conference has three goals:

- 1) **Networking.** To facilitate networking and cooperation among Advanced Lab folks in New England. Come and meet others interested in improving labs, get ideas, and local help implementing them.
- 2) **Hands-on Experience.** There are workshops and tours that participants can sign up to do. These get everyone in the lab doing an experiment or set of experiments. This is a fun way to get ideas or try something new.
- 3) **Latest News.** Come hear three speakers on Advanced Lab topics, with a focus on Optics and Photonics. (pun recognized!) Topics range from distinguishing between optical absorption and scattering to curriculum development of photonics-oriented labs.

Participation is limited to the first 30 registrants. No registration fee. Lunch will be provided. Details and full schedule will be emailed to participants after registration.

To Register: Go to https://advlab.org/2019_NERM for more information and to find the link for registration. Once you register, we will then email you a confirmation with detailed logistical instructions for the conference including parking and housing.
